

Introducing MX Online 8.2

Alliance by Protech

Alliance by ———
PROTECH

Agenda

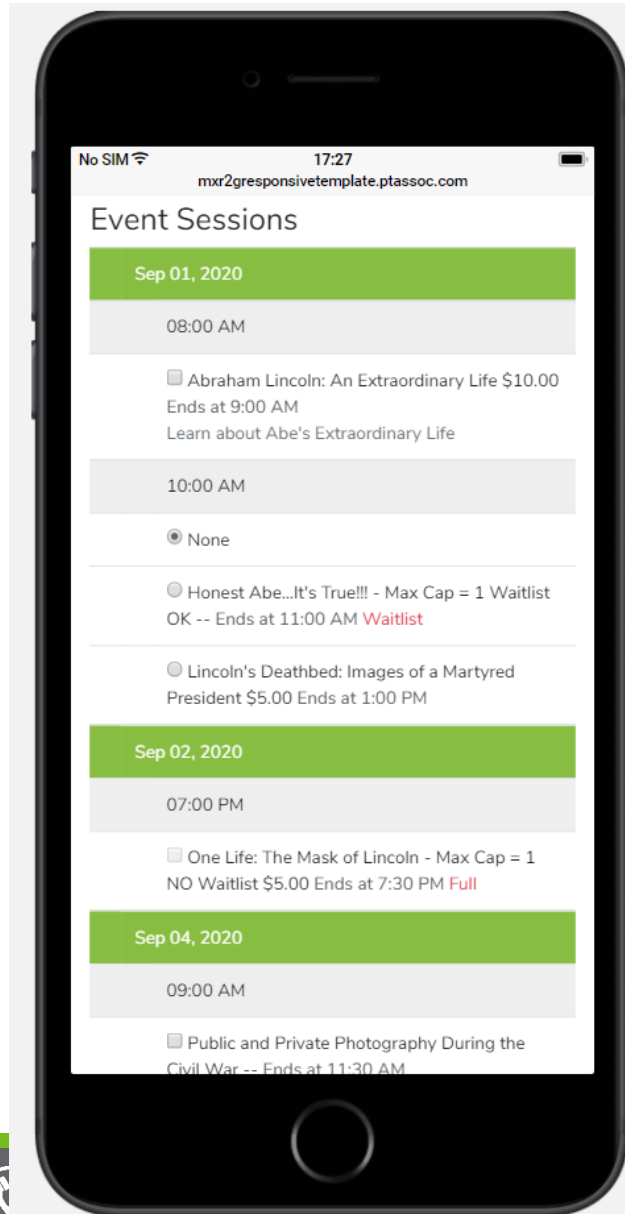

- Enhanced User Interface
- Promotional Packages module
- New Functionality
- New Template Site
- Getting to MX 8.2

Complete Mobile First Redesign

- All new Member Experience (MX)
- All Web Parts are Responsive
- Responsiveness means that the page layout adjusts based on the size of the devices they're on
 - Automatic device detection
 - Automatic re-sizing and wrapping
 - Automatic layout changes specifically for mobile screens
- Not tweaked – every web part was completely re-coded
- Open-Source Bootstrap Framework builds responsiveness into every control

Responds to the device being used to display

Tue, Sep 1, 2020 thru Sun, Sep 6, 2020

Registrant: DiCaprio, Leonardo

Lists with vertical layout replace multi-column grids

Enhanced Base Styling

Styling Enhancements

- Improved look and feel of the components and site (modern, clean, responsive)
- Improved stylability of the web parts – flow down from site styling
- Easier to apply custom themes
- Improved process flow
- Reduced clicks – user experience
- Removed obsolete solutions and proprietary styling
- Fully compatible with blended site CMS's
- New Stylesheet Architecture

Styling with Bootstrap v4

- A concept change from previous versions is that styling occurs at site level and not at MX component level. Because of the use of Bootstrap, changes are made to global styles that flow down to the components with the same look and feel as in the CMS content.
- At the same time, we have automatic classes that allow our consultants to customize specific component elements when necessary
- Based on Bootstrap - Bootstrap is the industry standard, open source styling framework for responsive design
- MX 8.2 uses:
 - Bootstrap 12 column grid system
 - Bootstrap components
 - Bootstrap classes
- Telerik has been replaced with HTML 5, CSS 3, JavaScript, JQuery

Promotional Packages Module

COMMON SCENARIOS

Sell registrations for a table for 8 or a table for 10, or a golf foursome. The table is a package, not a registration.

Sell registrations to multiple meetings as a single series, as with courses or a seminar series.

Set a discounted price for registering the group as a whole based on group size.

Set a custom price for the bundle of purchases by automatically assigning a promo code that the client doesn't need to know.

Package a membership with the registrations, so registrations are sold as an automatic benefit of membership.

Sponsorship Packages for Banquet Tables

2019 Chesapeake Bay Annual Conference - Sponsorship

Select Sponsorship Level:

☒ Bronze (\$600.00)

The Bronze sponsorship entitles the company to 4 registrations for the Annual Conference.

☐ Silver (\$1000.00)

The Silver sponsorship entitles the company to a table for 8 at the banquet and full conference registration for 2 of the attendees.

☐ Gold (\$1200.00)

The Gold sponsorship entitles the company to a table for 10 at the banquet and full conference registration for each attendee.

☐ Platinum (\$2400.00)

The Platinum sponsorship entitles the company to 2 tables for 10 at the banquet and full conference registration for each attendee.

Amount:

\$600.00

Other New Features

New MX Find Functionality

- MX Find Auto Template
- MX Find Editable Templates, new settings
- MX Find Stand-alone Search Form

New Meeting Registration Functionality

- Group Registration includes Guests, Single web parts
- Session Conflict Management
- Transfer Registration

New GDPR Compliance Functionality

- Cookie Notification
- Password Hashing

Auto Template

It's a new, simple and fast way to show data into a card without the need to create a template file in code.

This new template does not replace either predefined or custom templates, it represents a new alternative for some of the most common scenarios.

The MX Find Editable mode is now also available for template outputs. Auto Template supports this functionality.

The screenshot shows the 'MX Find - Configuration' window. At the top, 'Result ID name' is set to 'contactid' and 'Set columns width in' is set to 'None - Auto'. Below this is a table for 'Result columns'.

Attribute Name	Display Type	Order	Text	Line Break	Column/Field Title	Include	Width
pa_labelname	Title				Label Name	<input type="checkbox"/>	100
jobtitle	Subtitle				Job Title	<input type="checkbox"/>	100
address1_composite	Text Block 1	1		<input checked="" type="checkbox"/>	Address 1	<input type="checkbox"/>	100
description	Text Block 2	1		<input type="checkbox"/>	Description	<input type="checkbox"/>	100
emailaddress1	Text Block 1	2	Bold	<input checked="" type="checkbox"/>	Email	<input checked="" type="checkbox"/>	100
pa_profileimage					Profile Image	<input type="checkbox"/>	100
parentcustomerid					Company Name	<input type="checkbox"/>	100
telephone1					Business Phone	<input type="checkbox"/>	100

Below the table, 'Result display type' is set to 'Template'. A dropdown menu is open for the 'Display Type' of 'emailaddress1', showing options: Title, Subtitle, Text Block 1 (selected), Text Block 2, Text Block 3, Text Block 4, and Text Block 5.

At the bottom right, 'Item template' is set to 'Auto' and 'Item layout option' is set to 'Card Decks (equal width and height - not attached)'.

The footer of the window shows 'Villa Park, IL 21046' and 'US'.
